Bituminous Joint Sealant for Roofing

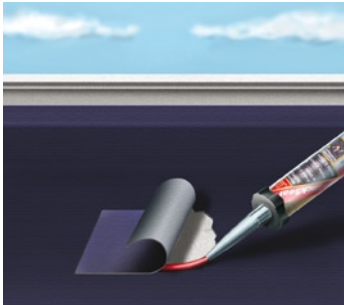

Sika BlackSeal® -1

Sika BlackSeal®-1 is a ready-to-use bituminous joint sealant for roofing

Unlike many of sealants it can be in contact with bituminous sheets and emulsions

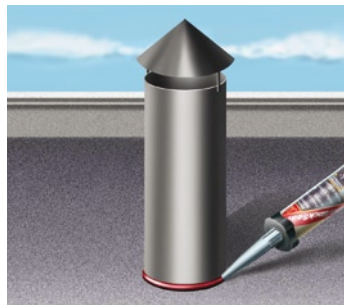

Sika BlackSeal®-1 for

- Patches and repairs on bituminous membranes
- As an adhesive and sealant for small overlaps and repair in roofing, shingles, straps etc.

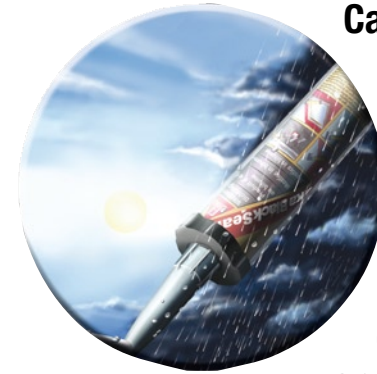

- For sealing of non-moving cracks in concrete slabs before the application of bituminous sheets or liquid membranes
- For sealing of cracks in planters (without water pressure)

- Sealing around roof penetrations such as pipes, skylights, connections etc.

Ideal for sealing around pipes, skylights and connections small repairs

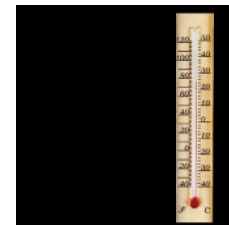

Can be applied over non-porous substrates even when it's raining!

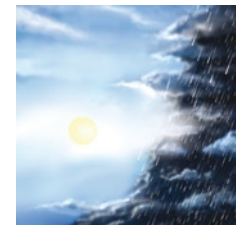

Application temperature between +5°C and +40°C (suitable for cold and hot climates)

Excellent bond to mortar, concrete, stone, metals, wood and bituminous surfaces, all without priming

Good resistance to wide temperature range when cured

Good resistance to weathering and ageing

Easy to apply! No heating! No flames! No mixing required!
